The 100 Most Common Words in Written English

The Oxford University list of the top 100 high-frequency words in written English is based on an analysis of the Oxford English Corpus, which is a collection of texts in English that has a combined total of over one billion words. This analysis was done by Oxford Online, in association with the Oxford English Dictionary. **Of these top 100 words, 60 are function words, including all but 2 of the top 30 words!** "the" is the most common word in written English.

From Wikipedia:

*"Note that the items listed may represent more than one actual word; they are **lemmas**. For instance the entry "be" contains within it the occurrences of "are", "is", "were", and "was". **Note also that these top 100 lemmas listed below account for 50% of all the words in the Oxford English Corpus.**" [emphasis mine]*
