## Clear Alphabet Dictionary

### Introduction

#### What is this book?

Wo ti zthi Sbuuk?

The Clear Alphabet Dictionary is a tool to enable students of English to learn new phonetic Clear Alphabet, so that they can use it confidently as a means to read, write, and understand the sounds of English – and as a result to pronounce words and sentences better. It is a tool that enables teachers to explain the relationship between spelling and sounds at word level, and connected speech at sentence and text level. If you are using *You Are The Course Book* method, the material in this book can be used at Stage 1 (Vocabulary) and Stage 5 (Pronunciation) of Modes 1 and 2. It could also be used with students who are studying *Talk a Lot Foundation Course*.

In the first part you can learn the 48 sounds of English and their corresponding written IDs (identifiers). For example, the vowel sound in “cheese” and “meal” is always written as ee in the Clear Alphabet. The second part is more like a traditional dictionary, with a word list of over two thousand common words and phrases – including all of the discussion words from *Talk a Lot Elementary Books 1-3* and *Intermediate Book 1*. Following this is a reduced word list of 400 Elementary-level words, which can be used with students who are new to the Clear Alphabet. The third part contain special topics relating to using the Clear Alphabet, including Silent Letters, Homophones, and Hidden Sounds. The fourth part has some examples of worksheets for use in class to learn the Clear Alphabet. The last two parts of book contain useful related material from *Talk a Lot Foundation Course* and *Talk a Lot Elementary Handbook*.

#### What is the Clear Alphabet?

Wo ti zth Kliy Ral f bet?

The Clear Alphabet is a modern phonetic English alphabet which uses the normal Roman alphabet, rather than symbols, to show the sounds of English. Each of the 48 sounds of English has one ID (identifier) in the Clear Alphabet, which is always written the same. (See Clear Alphabet Chart on p.17.) This allows us to write the sounds of English, rather than the normal spelling, which is often very different from the sounds. It also allows us to write full sentences and whole texts which show connected speech in action – the process where words merge together as we speak. It enables us to represent speech in written form clearly, showing syllables, stressed syllables, features of connected speech, and other elements of speech such as schwa sounds, glottal stops, silent letters, and hidden sounds, which are usually missing from written texts.

#### Why bother learning the Clear Alphabet?

Wai Bo th Ler ning th Kliy Ral f bet?

If students and teachers learn the Clear Alphabet they will be able to:

- Improve understanding and use of the differences between spelling and sounds in an English word, e.g.

normal spelling:

Clear Alphabet spelling:

ask  
car

Arsk  
Kar

# Talk a Lot

## Clear Alphabet Dictionary

### Introduction

heart                      Hart

- Improve understanding and use of pronunciation, including the use of the schwa sound and glottal stops

normal spelling:              Clear Alphabet spelling:

appointment              uh Poy\_n\_mnt (schwa sound indicated by \_uh ; glottal stop indicated by \_)

- Improve understanding and use of connected speech – including identifying the stressed syllables in a sentence – leading to improved listening skills through the knowledge of how native speakers of English actually speak

Normal spelling – not representative of speech:

I don't like living in a small flat.

Clear Alphabet spelling – showing connected speech, stressed syllables (capitalised), schwa sounds, glottal stops, and normal punctuation.

ai Deun\_ Lai Kli ving i n Smorl Flat.

### How is it different from the IPA (International Phonetic Alphabet)?

Hau wi zi\_ Di frn\_ frm thii yai pii Yei (in t Na shnl f Ne ti Kal f bet)?

The main difference is that the Clear Alphabet uses the Roman alphabet – the normal a-z that everybody already knows, rather than obscure symbols. This means that the Clear Alphabet can be transmitted via a normal keyboard – by computer, tablet, or phone – without a special font. While it is difficult (although not impossible) to create and share text in the IPA via digital means, it is much easier to do so with the Clear Alphabet.

From *Talk a Lot Foundation Course*<sup>1</sup>:

[The Clear Alphabet is] a new alphabet for the English language, which is similar to the IPA in that it enables the reader to see all the phonemes (sounds) contained in each word. However, unlike the IPA, [the Clear Alphabet] uses the more familiar Roman alphabet – a, b, c, etc. – and allows the reader to see the stressed syllable in a word as well as the connections between syllables and words. Each of the 48 sounds of English has its own written ID (identifier).

e.g. the “a” sound in “cake” is always written as ei – Keik

In normal spelling this sound can be written in different ways, but with [the Clear Alphabet] it always looks the same: ei

---

<sup>1</sup> Note: in *Talk a Lot Foundation Course*, the Clear Alphabet is referred to as the New English Alphabet (NEA)

# Talk a Lot

## Clear Alphabet Dictionary

### Introduction

e.g. make = Meik, day = Dei, change = Cheinj, etc.

Is the Clear Alphabet better than the IPA?

i zth Kliy Ral f be\_ Be t thn thii Yai pii yei?

From *Talk a Lot Foundation Course*:

The current IPA (International Phonetic Alphabet) was invented in the nineteenth century by French and British linguists. The IPA can be helpful in some situations, for example if a student takes the time to learn it they will be able to accurately pronounce any word in the dictionary. When teaching language – and especially pronunciation – we do need a way of representing sounds on a page, but the current IPA is no longer fit for purpose in the Digital Age, because it cannot be easily reproduced on a keyboard or mobile phone keypad. Just try sharing a document that uses IPA symbols and you will see what I mean. Everybody needs to buy a new font – which does not happen. So we need a new phonetic way of writing. Another problem with the IPA is that students have to learn a whole new alphabet of around fifty new characters. Students are often put off by the unfamiliar and exotic-looking symbols that they have to learn, which only adds an extra burden for students – especially those whose first language does not always use the Roman alphabet, e.g. those whose first language is Arabic, Russian, Chinese, etc. They already have to learn one new alphabet to learn English; then we try to add a second. It's no wonder the IPA is put on the back burner.

For example, let's compare this earlier sentence in the Clear Alphabet with its equivalent in the IPA:

Normal spelling:

I don't like living in a small flat.

Clear Alphabet spelling:

ai Deun\_ Lai Kli ving i n Smorl Flat.

IPA spelling:

/aɪ'deun? 'laɪ'kli.vɪŋ.ɪ.n'smɔ:l'flæt/

While Clear Alphabet spelling takes some learning and getting used to, it is far easier and more intuitive to learn than the IPA because the letters are already familiar, and has the added bonus of showing the stressed syllables – the all-important sound spine – as well as normal punctuation marks.

Is the Clear Alphabet a replacement for the current Roman alphabet?

i zth Kliy Ral f be t r Plei smn\_ f th Ku rn\_ Reu m Nal f bet?

# Talk a Lot

## Clear Alphabet Dictionary

### Introduction

In *Talk a Lot Foundation Course* I have argued that, yes, it could be:

We need a new written English alphabet. The old one (a, b, c, etc.) is not fit for purpose because it doesn't contain enough letters (especially vowel letters) to adequately represent all of the 48 sounds of English. We cannot write phonetically – as we speak – with this alphabet. It allows us to write words, but we speak syllable by syllable, not word by word. It doesn't show stressed syllables, but it is vital for us to know which syllables are stressed. It doesn't show the “hidden” features of spoken English – schwas and glottal stops – but if we don't use these features our pronunciation will be much worse, and communication will be reduced.

*The old written alphabet has 26 letters – but there are 48 sounds in English.*

*The old written alphabet has 5 vowel letters – but there are 23 different vowel sounds in English.*

[The Clear Alphabet] provides the remedy to both problems, because it allows us to write phonetically, representing the sounds we make when we speak. It is a true alphabet. It also clearly shows individual syllables, stressed syllables, schwas, and glottal stops.

### How many words are there in the dictionary – and how were they chosen?

Hau Me nii Wer dz th rin th Di kshn rii – yn Hau w thei Cheu zn?

The dictionary contains just over 2,000 common words and phrases, so it is not intended to be an exhaustive dictionary along the lines of a major English dictionary. Also, there are no definitions – just words in the Clear Alphabet and in normal spelling. However, the dictionary certainly contains enough terms for anyone to be able to understand and learn how the Clear Alphabet works and how it can be used to represent sounds in a word or sentence. The terms were chosen from a wide range of sources, with the focus on high-frequency words:

- |                                    |  |

## Clear Alphabet Dictionary

### Clear Alphabet – 48 Phonemes (Individual Sounds)

23 vowel sounds: **8 short** **5 long** **10 diphthongs** | 25 consonant sounds: **15 voiced** **10 unvoiced**

Each phoneme always has the same written identifier (ID). Letters not used from the old alphabet: c, q, x. When pronounced on their own, all consonant sounds (including unvoiced) are followed by a schwa sound, e.g. 7. buh. This is called an **embedded schwa sound**. Hear the sounds: <https://tinyurl.com/ca-sounds>

No.	Phonemic ID	Old IPA Symbol	Old Spelling	New Spelling	Type
1.	a	/æ/	bat	Bat	v / s
2.	ai	/aɪ/	time	Taim	d
3.	aiy	/aɪə/	hire	Haiy	d
4.	ar	/ɑː/	star	Star	v / l
5.	au	/aʊ/	cow	Kau	d
6.	auw	/aʊə/	power	Pauw	d
7.	b	/b/	bag	Bag	c / v
8.	ch	/tʃ/	cheese	Cheez	c / u
9.	d	/d/	dice	Dais	c / v
10.	e	/e/	leg	Leg	v / s
11.	ee	/iː/	three	Ttree	v / l
12.	ei	/eɪ/	plane	Plein	d
13.	eir	/eə/	pear	Peir	d
14.	er	/ɜː/	shirt	Shert	v / l

47.	z	/z/	zip	Zip	c / v
48.	zz	/ʒ/	revision	r Vi zzn	c / v
	—	/ʔ/	football	Fuu_ borl	

Key – v = vowel sound: s = short l = long d = diphthong | c = consonant sound: v = voiced u = unvoiced

# Talk a Lot

## Clear Alphabet Dictionary

### Learn the Clear Alphabet with Flashcards

Students can use the flashcards on pp.20-29 for learning and memorising the forty-eight sounds of English with the Clear Alphabet. The aim is to know the sounds by heart, so that they can look at any of the Clear Alphabet IDs (identifiers) on their own and say the sound straight away.

#### Instructions

1. Print the pages back to back onto thin card, in the following order:
  - print pages 20 and 21 back to back
  - print pages 22 and 23 back to back
  - print pages 24 and 25 back to back
  - print pages 26 and 27 back to back
  - print pages 28 and 29 back to back
2. Cut out the cards and laminate them, if possible, for extra durability.
3. For students: use the cards to learn the sounds by quickly testing yourself in spare minutes of the day, e.g. on the bus, at lunchtime, when you're watching TV, etc.
4. For teachers: use the cards to test your class for a short period of time every day, just to keep the identifiers and sounds in your students' minds, or give a set of cards to each student and encourage them to practise in pairs or small groups. You could use some or all of the activities below.

#### Key to Abbreviations

v / s	= short vowel sound
v / l	= long vowel sound
d	= diphthong
c / v	= voiced consonant (i.e. your vocal cords vibrate when you make it; feel your throat as you make a sound to find out whether it's voiced or not; if it vibrates, it is voiced!)
c / u	= unvoiced consonant (your vocal cords don't vibrate when you make this kind of sound)

Note: it's well worth getting students to learn the Clear Alphabet sounds with an extra layer of detail, so that they learn the concepts above. For example, that *e* isn't only a vowel sound, but that it's a *short* vowel sound; or that *n* isn't only a consonant sound, but it's a *voiced* consonant sound that makes your vocal cords vibrate – and also a friendly consonant sound.

#### Suggested Classroom Activities

I made my own flashcards like these to learn and memorise which sound each symbol of the IPA represented, when I was training to be an English teacher more than twelve years ago, but there are lots of other ways in which you could use them beyond simply learning quietly at home:

- a) Put all of the cards on the table – simple side up – in front of your students. Say a sound, and the first to find the correct card is the winner. Or, say “voiced consonant” or “long vowel sound”, etc. (as above) and the first to find one is the winner.

# Talk a Lot

## Clear Alphabet Dictionary

### Learn the Clear Alphabet with Flashcards

- b) Show a card with a sound on it and students have to say a word each that includes this sound.
- c) Students have to put several of the cards in order to make a simple word, e.g. “cat” =

- d) Or you could ask students to spell out their first name, or the make of their car, or their first pet's name, etc., or one (or more) of any current vocabulary word or phrase, using the cards. You may need a few sets of cards to be able to do this.
- e) Try this fun game for two students working in a pair (it could also be adapted for two small groups battling each other). Each student has half the cards from the set. They hold them in their hands in a (shuffled) pack so that the other student can't see which cards they've got. The first student produces the first card and their partner has ten seconds (or five, if your group is at a good level!) to say an English word that contains that sound. If they are correct they get the card, and put it in a separate pile from the pack in their hands. If they are wrong, or can't think of a word, the original student gets to keep the card, again putting it in a separate pile. Play alternates between the two students and continues until the students don't have any cards left in their hands. The winner will be the student with the most cards at the end of the game (or at the end of an agreed period of time, e.g. fifteen minutes). A variation to make the game harder would be to insist on two words (or more) for each sound, or to get the students to write the words using the Clear Alphabet, as well as saying them.
- f) Use the rhyming words listed on pp.30-40 to demonstrate how the same sounds in English can be achieved with very different spelling patterns. See also the information on Vowel Clusters (from p.203) and Consonant Clusters (from p.217) later in the dictionary. You could make the important point that English is not a phonetic language, and that the spelling of a word in English often bears little or no relation to the sounds that it contains.
- g) Or use the rhyming words to get students saying lots of words with the same vowel sound out loud. You could even get them to write sentences using as many words which have the same vowel sound in them as possible, for example:

Sound: ee

Sentence: “Pete’s feet feel the need for speed each week.”

or:

Sound: ei

Sentence: “Jane’s Danish mate made it plain that her place in Spain was a waste of space.”

Why not collect together the funniest or longest sentences and make a classroom display, or book.

## Clear Alphabet Dictionary

### Learn the Sounds of English with the Clear Alphabet – Sample Lesson Plan

<u>Activity Type:</u>	Introduction to the sounds of English with the Clear Alphabet
<u>Level:</u>	Elementary – Pre-Intermediate
<u>Skills:</u>	Speaking & Listening; Pronunciation
<u>Class Size:</u>	Whole group lesson, e.g. ten students in a group
<u>Time:</u>	1 hour
<u>Aim:</u>	To introduce the sounds of English with the Clear Alphabet; to lay the foundations for further study with the Clear Alphabet
<u>Materials:</u>	x1 Clear Alphabet chart handout (p.17) per student, whiteboard and pens; students have their notebooks and pens

*Note: this lesson focuses on teaching the vowel sounds of English, with only a little focus on the consonant sounds. This is because most of the consonant sounds can be guessed at, because they are encountered in English already (e.g. g , t , d , etc.). The vowel sounds are more difficult to learn from scratch, so we spend more time with them during this lesson, although we do also look at some of the stranger-looking consonant sounds (e.g. ng , tt , zz , etc.) towards the end of the lesson.*

#### Procedure:

1. Give out the handouts as students come into the class. This gives them time to look at them, comment (e.g. “On no!”), and get ready for the lesson.
2. Tell students that you’re going to learn the sounds of English with the Clear Alphabet. Write on the board:

#### Vowel sounds

Your language: \_\_\_\_  
English: \_\_\_\_

Elicit how many vowel sounds there are in your students’ first language (or different students’ first languages for mixed nationality groups), and write it on the board. Make sure you know that answer before the lesson, e.g. in Polish there are 8 vowel sounds. Elicit from students how many vowel sounds there are in English (23). No doubt they will be surprised at the disparity between the two numbers. In English there are a lot of vowel sounds! Explain that lack of knowledge of English vowel sounds causes many mistakes in pronunciation.

3. Explain why you are doing this activity today. When I did this, I read a short text in Polish (which my friend helped me to write, because I’m an elementary rather than fluent Polish speaker). The text helped the students to understand the aims of the lesson. It went something like this (in Polish):

# Talk a Lot

## Clear Alphabet Dictionary

### Learn the Sounds of English with the Clear Alphabet – Sample Lesson Plan

*“If you know the phonetic alphabet, you know how to pronounce words. This alphabet gives you power. Power!”*

(Here I emphasised the word “power” (“moc”) in Polish for comic effect, as well as to make my point: **“Da wam moc! Moc!” – “Gives you power! Power!”**)

*“You will be able to speak better in English. Polish is a phonetic language. In general, you write like you speak.”*

(Here I stopped to emphasise this important concept. I pointed out that, for example *“The letter ‘a’ in Polish is always pronounced a , and the letter ‘o’ in Polish is always pronounced o . Pronunciation in Polish is generally easier than in English.”* The students agreed. I asked them in Polish: “Is English a phonetic language?” The students grimaced and shook their heads, laughing, because no, of course English is most definitely **not** a phonetic language!)

*“English is not a phonetic language. We write differently to how we speak.”*

(I illustrated this by writing the following words on the board: “my”, “high”, “pie” and eliciting the pronunciations. I wrote each word phonetically and explained that in the dictionary there are two spellings for each word. The normal spelling is usually no help at all for working out the sound of the word. By contrast, the phonetic spelling gives us the sound of the word. You could use more examples to show that although English words can have exactly the same sounds, the spellings can be completely different. Students sometimes ask why this is, but the lesson’s too short to go into the answer in much detail, although you could explain that English has developed from many different languages over hundreds of years, which has helped to push spellings and sounds apart.)

different spellings:	same vowel sound:
my	mai
high	Hai
pie	Pai

4. Once everybody understands why they’re doing the lesson, write on the board:

8 short vowel sounds | 5 long vowel sounds | 10 diphthongs

Drill each group of sounds in turn. I asked my students to listen, repeat, and write notes. I read each sound loudly and clearly four times, with students repeating each time, and writing down notes about each sound to help them remember it. They were able to use letters from Polish to represent each sound. Give a good, clear model of each sound, or use the .mp3 file from the Talk a Lot website as your classroom model: <https://tinyurl.com/ca-sounds> Use examples of words that contain each sound, e.g. the ones on the handout, or different words that your students will know.

# Talk a Lot

## Clear Alphabet Dictionary

### Learn the Sounds of English with the Clear Alphabet – Sample Lesson Plan

Highlight sounds that are the same in your students' first language and in English. For example, the sound *o* is the same in Polish and in English. In English, the pronunciation *Sok* means "sock", that we wear on a foot, whilst in Polish *Sok* means "juice" that we drink from a bottle. Let your students have fun and enjoy making the sounds, which may be new for many of them. My Polish students love saying the long vowel sounds, or the guttural grunt schwa *uh* (that comes from the belly), and the classroom is filled with laughter, as well as the vowel sounds of English!

5. Explain that diphthongs are "double sounds" or two sounds together. For example:

*e + i = ei*

Encourage students to try saying the two sounds together, getting quicker and quicker until they arrive at the diphthong *ei*. Show students how the mouth has to move when pronouncing a diphthong – changing from the first position (for the first sound) to the second position (for the second sound). Spoken English is a work-out for the mouth and tongue!

6. After modelling and drilling short vowel sounds, long vowel sounds, and diphthongs, go back to the beginning and ask your students to listen and repeat each sound (about four times). Here you may be able to spot some errors in speaking the sounds, that you can correct straightaway.

7. At this point I always stop and congratulate the group: "Well done! You can do it. You see, you **can** make all of the vowel sounds in English. You don't need to use all of these sounds in your language, but you **do** need to use them all in English."

8. Spend a few minutes looking at the consonant sounds. Explain that it is most important to be able to recognise the vowel sounds, because they are what cause the most confusion and the greatest number of errors in pronunciation. Elicit from students – by saying them out loud with them – that consonant sounds are either voiced (with voice) or unvoiced (without voice). Almost all of the consonant sound IDs look exactly how students would expect them to (unlike with the IPA), whilst a few are different and need closer attention:

- *22 consonant sound IDs that students are likely to know and recognise already:*

*b, ch, d, f, g, h, j, k, l, m, n, ng, p, r, s, sh, t, th, v, w, y, & z*

- *3 consonant sounds that look different from how we expect, and need extra study:*

*tt, zz, hh*

9. Take general feedback from students and answer any questions they might have. There's been a lot to take in! Explain that this lesson is only an **introduction**, that they're not expected to learn all forty-eight sounds of English in one hour, and that you will continue to look at the sounds of English with the Clear Alphabet throughout the course – for example, using activities from this dictionary (see from p.47). Perhaps give out one set of flashcards to each student so that they can learn the sounds at home (see pp.20-29). You could also create your own tests to check students' progress (see Sample Test on p.44).

[This article was adapted from *Talk a Lot Elementary Handbook*.]

## Clear Alphabet Dictionary

### Clear Alphabet Test (Sample)

1. Write your first name using the Clear Alphabet: \_\_\_\_\_

2. Write two words in English that contain the same vowel sound:

a) i \_\_\_\_\_  
b) a \_\_\_\_\_

3. Write two words in English that contain the same diphthong:

a) ei \_\_\_\_\_  
b) eir \_\_\_\_\_

4. Write two words in English that contain the same consonant sound:

a) tt \_\_\_\_\_  
b) ch \_\_\_\_\_

5. Translate the following sentences into English:

a) n Ta sh Du zn\_ Won\_ e nii So s jz.

b) ai Nee d Ku p l Vnyoo Sher\_z

6. Write the following sentences using the Clear Alphabet:

a) Can I have a drink, please? \_\_\_\_\_

b) My brother's name is Phil. \_\_\_\_\_

c) He wants me to go to the theatre. \_\_\_\_\_

d) There isn't any coffee. \_\_\_\_\_

7. Write these words in your first language, then (where possible) translate the results into the Clear Alphabet:

a) bread \_\_\_\_\_  
b) newspaper \_\_\_\_\_  
c) friend \_\_\_\_\_  
d) shoulder \_\_\_\_\_

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

Here are some classroom activities for learning the Clear Alphabet. Simply choose a handful to build your pronunciation lesson. Of course, you could also use your own ideas and activities with the Clear Alphabet. The activities fall into the following categories:

1. Translation
2. Vowel Sounds
3. Schwa Sound
4. Consonant Sounds
5. Connected Speech
6. Syllable Focus
7. Sound Focus
8. Word Focus

#### 1. Translation

- Translate words and phrases (items) into English, e.g. one page, one column, or a fixed number. For lower-level learners: use the reduced list of 400 Elementary Words (from p.140), or the even shorter list of 100 Basic Words with the Clear Alphabet (p.185).
- Say a word or phrase – your partner writes it with the Clear Alphabet; they say one – you write it with the Clear Alphabet.
- Translate words into your first language, e.g. one column or one page.

#### 2. Vowel Sounds

- Choose an item and sound out loud each phoneme (sound) in each syllable; then sound out loud each syllable separately; then say the item. Pay particular attention to stressing the stressed vowel sound.
- Circle the stressed vowel sound in an item written in the Clear Alphabet.
- Identify the stressed vowel sounds in one set of items (e.g. one page) and put them into groups. Which sounds occur most/least frequently? How many are long or short? Focus on learning the most common vowel sounds.
- Which vowel letters are most often reduced when we speak? Tip: look at the weak stressed syllables in a group of words and identify where sounds have been reduced, e.g. “to” is often pronounced *t* in a sentence, meaning that the *oo* sound has been reduced, and “for” is often pronounced *f* in a sentence, meaning that the *or* sound has been reduced.
- Find *x* (5, 10, 20, or whatever) examples of assonance – words and phrases that have the same vowel sounds (stressed or not). This could be with a pair or group of words, e.g. “hair” and “wear” both share the same vowel sound: *air* . Or it could be within the same word or phrase, e.g. the word “expensive” has two *e* sounds: *e* Kspen sɪv , while the phrase “fruit juice” has two *oo* sounds: *Froo\_ Joos* .
- Find *x* items which have sounds from a particular vowel sound group: short, long, or diphthong.
- Find *x* items that have a stressed vowel sound which also appears in another syllable in the same item, e.g.

roundabout  
steering wheel

**Raun d baut**  
**Stiy ring wiyl**

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

Wi-Fi  
work experience

Wai fai  
wer k Kspiy riyns

- Using a given set of items, make groups of words which have the same vowel clusters in the normal spelling, then match them with their Clear Alphabet counterparts. Emphasise the point that while vowel clusters in the Roman alphabet vary wildly – with sometimes many different spellings for the same sounds – each sound always looks the same in the Clear Alphabet:

Clear Alphabet spelling: er

Some of the vowel clusters used to represent this sound in the Roman alphabet:

her, stir, fur, learn, world, earl, purr, whirr, were, burgh, etc.

The section *Rhyming Words – Vowel Sounds and Diphthongs* on pp.30-40 will be useful for this. See also from p.203 for more about vowel clusters.

- Challenge SS to find words which are comprised completely of one vowel sound, e.g. I, are, hour, etc. There are 9 of this kind of word in the dictionary:

a	uh
air	Eir
are	ar
ear	Iy
eye	Ai
hour	Auw
I	ai
or	or
owe	Eu

### 3. Schwa Sound

- Find  $x$  items that have a schwa sound (either the visible uh , or an invisible embedded schwa sound) and practise pronouncing them – paying particular attention to the schwa sound.
- Look for  $x$  examples of an embedded schwa sound, which is a schwa sound that occurs naturally after saying a consonant sound, e.g. in the word “cinema” there are two embedded schwa sounds: Si n m . One occurs naturally when we pronounce the sound n and the other occurs naturally when we say m .
- List  $x$  words which have visible schwa sounds, e.g.

uh Gree	agree
uh Plai	apply

Tip: these will generally be words that begin with “a-” which means that there isn’t a consonant sound for the schwa to be embedded in. See pp.229-230 for a list of *Two-Syllable Words where the First Syllable is a Schwa*.

- Look for  $x$  items with more than one syllable that do not have any schwa or short i sounds (known as the “2nd schwa sound”) – but a full vowel sound in every syllable, e.g.

borrow	Bo reu
download	daun Leud

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

freesheet  
product

**Free** sheet  
**Pro** dukt

Note how most words and phrases contain at least one schwa or short *i* sound, and often more than one.

- Find *x* items that have one or more short *i* sounds in the weak stressed syllables, e.g.

m Ka nik  
Rai ting

mechanic  
writing

#### 4. Consonant Sounds

- Choose an item and sound out loud each phoneme (sound) in each syllable; then sound out loud each syllable separately; then say the item. Pay particular attention to stressing the stressed vowel sound.
- Find *x* items which have voiced/unvoiced consonant sounds.
- Find *x* examples of consonance – words and phrases that have the same consonant sounds. This could be with a pair or group of words, e.g. “you” and “yet” both start with the same consonant sound: *y* . Or it could be within the same word or phrase, e.g. the word “mushroom” begins and ends with a *m* sound: Mu shroom , while the word “surface” begins and ends with a *s* sound: Ser fs .
- Find *x* items which have a syllable which consists only of consonant sounds (with or without an embedded schwa sound), e.g.

sequel  
husband

See **kwl**  
Hu **zbnd**

Practise pronouncing all the sounds in these syllables. (Remember that they are not stressed!)

- Identify *x* different consonant clusters and compare them with the Roman alphabet. Notice that they are often the same, e.g.

**bread**  
**change**

**Bred**  
**Cheinj**

...but not always, e.g.

**thick**  
**cough**

**Ttik**  
**Kof**

See from p.217 for more about consonant clusters.

#### 5. Connected Speech

- Discuss how phonetic spelling changes when a word is added to a sentence, e.g. when a word ending with a consonant sound meets a word beginning with a vowel sound, the consonant sound usually moves forward: “small apple” = Smor La pl . See *Talk a Lot Foundation Course* for more on connected speech.
- Look for *x* examples of assimilation where a sound changes making it easier to pronounce with the next sound, e.g. *b* can become *p* :

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

job security	jo ps Kyuuw r tii
website	We psait

See *Problem Sound Connections* from p.170 for more examples.

- Look for  $x$  examples of elision, where the first sound in a cc sound connection is deleted, making the connection easier to pronounce, e.g.  
friendship                      Fren ship  
sit down                         Si\_ Daun

See *Words and Phrases with Glottal Stops* on p.166 for more examples.

- Look for  $x$  examples of FCL (forward consonant linking), e.g.

Pacific Ocean	p si fi Keu shn
whatever	wo Te v

...and many phrasal verbs, e.g. “come in” = Ku Min

- Look for  $x$  examples of vv (vowel sound to vowel sound) linking, e.g.

emergency exit	i mer jn sii Ye_ ksit
humiliate	hyoo Mi lii yeit
interviewer	In t vyoo w

- Look for  $x$  examples of problem sound connections, where the Clear Alphabet looks awkward, e.g.

vegetable	Ve cht bl
popcorn	Po pkorn

See *Problem Sound Connections* from p.170 for more examples.

- List  $x$  items which have one or more syllables ending with a friendly consonant sound: m , n , ng , or l .
- Find  $x$  items that have a glottal stop and practise making glottal stops. See *Words and Phrases with Glottal Stops* on p.166 for more examples.

#### 6. Syllable Focus

- Mix up the order of syllables in a word or phrase and SS have to identify it. See p.200 for a sample activity using this idea.
- Remove one or more syllables from a word or phrase and SS have to identify the word, e.g. write the following on the board and SS have to guess the missing syllable and write it in both normal spelling and the Clear Alphabet, e.g.

pre zn\_ Tei \_\_\_\_\_

The word is “presentation” and the missing syllable is: tion / shn

- Find  $x$  items that have one (or more) matching syllables, e.g.

<b>km</b> Pleet	complete
<b>km</b> Pyoo t	computer

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

- Find  $x$  words that have one (or more) syllables which are phonetic, i.e. written the same in the Clear Alphabet and in normal spelling, e.g.

<b>Win</b> deu	<b>w</b> indow
Kam <b>ping</b>	cam <b>ping</b>

#### 7. Sound Focus

- Choose a set of items from the dictionary (e.g. one page or half a page) and examine which sounds occur more or less frequently. For example, **zz** is not a very common sound in English, apart from in words with “vision”.
- Choose a group of  $x$  words and phrases and compare how many letters each has versus how many phonemes (individual sounds) it has, e.g.

<i>Normal Spelling:</i>	<i>CA Spelling:</i>	<i>No. Letters:</i>	<i>No. Phonemes:</i>
arrive	uh Raiv	6	4: uh r ai v
what	Wot	4	3: w o t

- Focus on learning IDs in Clear Alphabet which are not immediately obvious or intuitive ( ee , oo , etc.) and need to be specifically learned, e.g. tt , zz , iy , \_ , and so on.

#### 8. Word Focus

- Focus on minimal pairs. A minimal pair is a pair of words which have exactly the same sounds, apart from one sound, e.g.

large	Larj	rice	Rais
laugh	Larf	right	Rait

There are plenty more examples on p.161, but also try to find your own examples.

Activity: **consonant sound sandwich!** Choose two consonant sounds and see how many different vowel sounds you can put between them to make new words... e.g. b – g: bag, bog, big, then two sounds in between, e.g. brag, blag, etc.; then three, and so on.

- Look for  $x$  examples of silent letters, which are letters which appear in the spelling of a word, but are not pronounced, e.g. the letter “w” in “wrist” or the letter “u” in “guess”. See *Silent Letters* on p.162 for more examples.
- Look for  $x$  examples of hidden sounds – sounds that are pronounced in a word, but do not appear in the spelling, e.g. the ng sound in “pink” = Pingk .

See *Hidden Sounds* from p.164 for more examples.

- Look for  $x$  sets of homophones, which are words that have all the same sounds, but different spellings and different meanings, e.g.

aunt, aren't	Arnt
eight, ate	Eit

See *100 Sets of Common Homophones* on p.160, but also try to find your own examples. You can find free printables about homophones to download at <https://www.purlandtraining.com>.

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

- Look for  $x$  examples of common suffixes – notice how they are not stressed, e.g.

ing	dining table	Dai ning tei bl
tion	discrimination	di skri m Nei shn
ment	disillusionment	di s Loo zzn mnt
er	teacher	Tee ch
or	doctor	Do kt
y	happy	Ha pii

and so on. See pp.225-227 for more on the topic of suffixes.

- Find  $x$  words which look totally different from their normal spelling, e.g.

s Li s t	solicitor
Fyuuwl	fuel

- Find  $x$  items in the dictionary (or think of your own examples) which have different stress depending on the type of word they are, e.g. when “record” is a noun, we stress the first syllable, but when it’s a verb (“record”) we stress the second syllable. For more examples, see *List of Noun/Verb Homographs* on p.228.
- Put a group of  $x$  items written in the Clear Alphabet into alphabetical or reverse alphabetical order, e.g.

*Alphabetical Order:*

Eu pn  
Ke mist  
Sen s ship  
Yoo

*Reverse Alphabetical Order:*

Yoo  
Sen s ship  
Ke mist  
Eu pn

SS could then translate each item back into normal spelling.

- Make a list of features of the Clear Alphabet that are always or generally true, e.g. plural nouns tend to end with a  $z$  sound rather than  $s$ , and phrasal verbs are normally stressed on both syllables, and so on.
- Look at a group of  $x$  words and phrases written in the Clear Alphabet and discuss: which are easy to recognise and which are difficult? What are the possible reasons for this, e.g. some words are already phonetic in normal spelling and as such are spelled the same in the Clear Alphabet (“bus” = Bus) while other words contain phonetic spelling that may be unfamiliar for students, e.g.  $tt$  represents “th” in words like “thick”. (See p.159 for more Phonetic Words.) Or the use of connected speech in the Clear Alphabet – spelling syllable by syllable – might be confusing for students at first, e.g. the use of FCL in the phrase “make sense”: mei Ksens .
- Discuss words that come from the same root in both English and your first language, e.g. for Polish speakers: “million” (English) and “milion” (Polish); “mineral” (English) and “mineralny” (Polish). What difference is there in pronunciation? This can help to reveal interference from students’ first languages, e.g. in Polish the language is fairly phonetic and all written letters are usually pronounced, while in English unstressed vowel sounds are generally not pronounced.

#### 6 fun activities using “Translate from Normal Spelling” pages:

##### 1. Translation

- Translate items into the Clear Alphabet, e.g. one page or one column.

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

- Translate items into your first language, e.g. one page or one column.
  - Print one page: how many words/phrases do you know? / not know? Translate them into your first language and learn them.
2. Word Focus
- Do any Discussion Word activities from *Talk a Lot Elementary Books 1-3* or *Intermediate Book 1* with a given group of words from the dictionary (or your own choice of words). Or you could base a complete *You Are The Course Book* Mode 1 process on your word list.
  - Guess which Talk a Lot unit a word or phrase comes from, e.g. “learner driver” comes from “Unit 6: Cars” from *Talk a Lot Elementary Book 2*; or identify words that you think are not discussion words in any of the Talk a Lot books, e.g. “why” is not, because it’s a function word rather than a noun, and similarly “busy” is not a discussion word, because it’s an adjective.
  - Look for homographs – two words which have the same spelling but different meanings, e.g. park (verb or noun), live (verb or adjective), rose (verb or noun), and import (verb or noun). For more examples of homographs see p.228.

#### 8 fun activities using “Normal Spelling & Clear Alphabet Spelling” pages:

1. Word Focus
- The whole list makes a useful vocabulary list for all students to learn, from beginner level upwards.
  - Record an audio (or video) version of a group of items, with a clear reading of each word and phrase.
  - Use the dictionary to make list(s) of high-frequency words (e.g. the ten most common words in English) or words that you use a lot; list words that you know but seldom or never use, and resolve to try to use them more often; list words that are new for you and learn them – both spelling and sounds.
  - Choose a group of *x* words, or half a page, or two pages and write beside each word or phrase what kind of word it is, e.g. noun, verb, adjective, etc.

brought	verb
brown	adjective
browse	verb
browser	noun

...and so on. Put the same kinds of words into groups (word classes), e.g. you could list *x* different colours, or past participles.

2. Sound Focus
- Compare the normal spelling with the phonetic spelling. Sound out each sound in the word.
  - Look for words that rhyme, e.g. power, hour, flower, etc. For more on *Rhyming Words* see pp.30-40.

# Talk a Lot

## Clear Alphabet Dictionary

### Classroom Activities for Learning the Clear Alphabet

- Study spelling and sounds further with any of the special topics in this book. See from p.159.

#### 3. Translation

- Make a sentence using words picked randomly from the dictionary, e.g.

boxing                  carrot                  popstar                  allergy

The popstar always had an allergy to carrots after boxing.

...then translate it into the Clear Alphabet:

th Po pstar Ror lwei Zha d Na l jii t Ka r\_ sar ft Bo ksing.

...or use consecutive words in the dictionary which may or may not be related, e.g.

referee                  refund                  refuse                  refute

The referee refuted the argument of the sales assistant who had refused him a refund.

...which translates into the Clear Alphabet as follows:

th re f Ree r Fyoo t\_ thii Yar gy mn t vth Seil z si stn\_ too w tr Fyoo sti m Ree fund.

#### 8 more fun things that you can do with this dictionary:

- Study the longer phrases that had to be cut out of the main dictionary (p.167).
- Study the list of words and phrases that look confusing in the Clear Alphabet (p.168).
- Study problem sound connections in the Clear Alphabet (p.170).
- Learn high-frequency words in English with the Clear Alphabet (pp.140-157, and p.185).
- Practice translating and reading aloud different role plays and texts with the Clear Alphabet (pp.188-195).
- Compare the use of the Clear Alphabet and the IPA with a discussion words activity (pp.196-198).
- Use the Clear Alphabet to do practice activities from *Talk a Lot Foundation Course*, e.g. Cut-Up IPA Sentence (pp.200-201).
- Use the flashcards (from pp.18-29) and specially written practice material (pp.174-183) – or, even better, create your own!

## Clear Alphabet Dictionary

### Silent Letters

Here are some good examples of items in the dictionary which have silent letters. The Clear Alphabet ignores letters which are not pronounced. Silent letters often occur because the vowel letters in unstressed syllables are converted into schwa sounds when we pronounce them; or when double letters represent one consonant sound, e.g. "ff" for f , and so on. Note: reading this list out loud is a good way of testing students' understanding of the use of the schwa sound in English pronunciation:

Normal Spelling:	CA Spelling:	Silent Letter(s) (in spelling but not pronounced):
autumn	Or tm	
build	Bild	
butter	Bu t	
candidate	Kan d dt	
cinema	Si n m	
criminal	Kri m nl	
customer	Ku st m	
debt	Det	
differ	Di f	
elephant	E l fnt	
escalator	E sk lei t	
giraffe	j Rarf	
gorilla	g Ri l	
guess	Ges	
illness	Il ns	
indicator	In d kei t	
knee	Nee	
manager	Ma n j

### Hidden Sounds

Here are some good examples of words and phrases in the dictionary which have hidden sounds – sounds which are heard when you say the word, but don't appear in the normal spelling. There are no clues that they exist so students have to learn the hard way – by making mistakes. In the Clear Alphabet, hidden sounds are revealed, because all sounds are written – apart from embedded schwa sounds. Can you think of any more words in each category?

#### Hidden Sound: y

commuter	k Myoo t
emu	Ee myoo
euthanasia	yoo tt Nei ziy
humiliate	hyoo Mi lii yeit
knew	Nyoo
millionaire	mil y Neir
new	Nyoo
numeral	Nyoo m rl
onion	Un yn

### Words that Look Confusing in the Clear Alphabet

*It's difficult to understand a word in the Clear Alphabet when it looks like a word written in normal spelling. Here are some examples of words in the Clear Alphabet that look like normal English words.*

*This can happen when a syllable with a single phoneme is represented by one letter, e.g. O f = "offer", but looks like the word "of". It is especially true of items that have embedded schwa sounds – which are not shown in the Clear Alphabet. It also often occurs with diphthongs such as ai and ei and long vowel sounds, e.g. eir and or .*

*If you are working with the Clear Alphabet, you need to learn to think differently – in sounds and syllables rather than letters and words. Can you find any more examples like the ones below?*

Normal Spelling:	CA Spelling:	Other English word that it looks like:
cider	Sai d	said
reader	Ree d	reed
farmer	Far m	farm
summer	Su m	sum
jumper	Jum p	jump
slipper	Sli p	slip
letter	Le t	let
matter	Ma t	mat
porter	Por t	port
figure	Fi g	fig
offer	O f	of
pasta	Pa st	past
winner	Wi n	win
line	Lain	lain
mile	Mail	mail
pint	Paint	paint
ride	Raid	raid
side	Said	said
while	Wail	wail
white	Wait	wait
wine	Wain	wain
nail	Neil	Neil
nothing	Nu tting	nutting
since	Sins	sins
suit	Soot	soot
pence	Pens	pens
tense	Tens	tens
walk	Work	work
ward	Word	word
warm	Worm	worm
wear	Weir	weir

## Clear Alphabet Dictionary

### Problem Sound Connections – when Clear Alphabet Looks Awkward!

*There are a few occasions when we need to stop and think twice about how to represent sounds using the Clear Alphabet. Here are a few examples of words and phrases like that in the dictionary. Problems can often occur thanks to difficult-to-pronounce cc sound connections, e.g. a hard (voiced) d sound meets an equally hard (voiced) k in the middle of “childcare” – and d loses! We have to move it forward and change it to the softer (unvoiced) t : Chail tkeir . This also gives us examples of assimilation – a sound changes to make the sound connection easier – e.g. in the above case d changes to t .*

*Can you find/think of any more items in each category?*

#### 1. Issues with cc sound connections:

##### a) hard (voiced) d changes to soft (unvoiced) t

childcare	Chail tkeir
childhood	Chail thuud
classified advert	kla s fai Ta tvert
goldfish	Geul tfish

## Clear Alphabet Dictionary

### Problem Sound Connections – when Clear Alphabet Looks Awkward!

website                      We\_ psait  
e) j (voiced) changes to ch (unvoiced)

vegetable                      Ve cht bl

f) p moves forward (FCL)

hip-hop                      Hi phop  
popcorn                      Po pkorn  
update                      U pdeit  
upgrade                      U pgreid

2. It can look awkward when several consonant sounds have to be “front-loaded” onto the beginning of a syllable:

a) Examples with 2 sounds:

English Channel                      ing gli Shcha nl  
public toilet                      pu bli Ktoy lt

b) Examples with 3 sounds:

clothes shop                      Kleu thzshop  
detached house                      d Ta chthaus  
withdrawal                      wi Thdrorl

...but that's how native speakers of English really speak!

3. Foreign words in English:

a) Some words in English include foreign sounds that are rarely used in English, e.g. a sound from Welsh that is not common in English is: hh .

Llandudno                      hhlan Du tneu

English native speakers tend to shy away from making the guttural hh sound, and use l instead:

Llandudno                      lan Du tneu

b) We can't write some foreign words in the Clear Alphabet because the Clear Alphabet only includes the 48 sounds of English. Other languages have sounds which are not heard in Standard English pronunciation, e.g. the “rolling r” sound in Polish. There are even different sounds in American English which do not feature in British English, and therefore are not included in the Clear Alphabet.

4. When a glottal stop comes at the end of a syllable which occurs before another consonant sound, e.g.

partner                      Par\_ n

# Talk a Lot

## Clear Alphabet Dictionary

### Problem Sound Connections – when Clear Alphabet Looks Awkward!

5. Just consonant sounds written together (with embedded schwa sound, which is invisible, just assumed). These syllables can look daunting!

picture	Pi kch
usual	Yoo zzwl
Oxford	O ksfɪ
pregnancy	Pre gnn sii

*n beside n can present a challenge at first glance!*

6. Some words just look strange in the Clear Alphabet, for a variety of reasons:

singer	Sing uh	a schwa sound on its own looks odd!
theatre	Ttiy t	

*any word with tt , or any unfamiliar ID, e.g. zz or iy – you just have to learn the Clear Alphabet identifiers (see p.17).*

7. Very rarely, a combination of Clear Alphabet IDs can be ambiguous:

food hygiene	foo Thai jeen
--------------	---------------

*is th one single ID (one phoneme), representing th in “them”, or is it two separate IDs (two phonemes): t and h ? In this case, it is the latter. It is hoped that students will be able to make the correct choice thanks to their understanding of the actual word or phrase being studied. (An added complication here is that the syllable in question also looks exactly like an English word, the nationality “Thai”. Like any human system, the Clear Alphabet is not perfect!)*

## Examples of Worksheets for Class Use

# Talk a Lot

## Clear Alphabet Dictionary

### Practice Worksheets – Instructions

Here are a few practice worksheets for learning the Clear Alphabet, with the topics “Countries”, “Leisure Activities”, and “Famous People”. They are graded in difficulty, so translating from the Clear Alphabet is the easiest activity, translating into the Clear Alphabet (using the Clear Alphabet chart) is a little harder, and the hardest is identifying words from mixed-up Clear Alphabet syllables.

I didn't want to write pages and pages of practice material because my aim is to encourage *you* to create your own activities using vocabulary that is most relevant to you – to develop self-sufficiency rather than dependence on professional writers. Students could practise translation activities of this kind with *any* set of vocabulary words.

#### Tips:

- Some of the Clear Alphabet spellings are easier to recognise than others, because they are already fairly phonetic in the normal spelling, e.g.

Wo ching Tee Vee                      = watching TV

You could adjust this kind of activity to the students' level, including more easier Clear Alphabet spellings for lower levels, and fewer for higher levels

- Get SS to identify and sound out all of the different sounds (phonemes) in a syllable loudly and put stress on stressed syllables
- Get SS to extend the word or phrase into a short single clause sentence, e.g.

Plei ying Golf                      becomes:                      ai Lai Kplei ying Golf.

- Cut up syllables from several words and mix them up. SS have to identify the 4, 5, 6, etc. different words, which could all be on the same topic
- Make a gap-fill activity with items which have one or more syllables missing, e.g.

E kw \_\_\_\_\_ (dor – Ecuador)

- Match Clear Alphabet spellings to one-sentence clues, e.g.

“A warm European country with a long Atlantic coastline which is good at football.” = Por ch gl

- ...or use any of the activities in the List of Activities from p.47

Here are some more examples of countries with the Clear Alphabet:

Macedonia	ma s Deu niy
New Zealand	Nyoo Zee Ind
Lithuania	li tt Wei niy
Bangladesh	bang gl Desh
Northern Ireland	nor th Naiy Ind
Cameroon	ka m Roon
Guatemala	gwo t Mar l
Antarctica	an Tar kti k

### The 100 Most Common Words in Written English

The Oxford University list of the top 100 high-frequency words in written English is based on an analysis of the Oxford English Corpus, which is a collection of texts in English that has a combined total of over one billion words. This analysis was done by Oxford Online, in association with the Oxford English Dictionary. **Of these top 100 words, 60 are function words, including all but 2 of the top 30 words!** "the" is the most common word in written English.

From Wikipedia:

*"Note that the items listed may represent more than one actual word; they are **lemmas**. For instance the entry "be" contains within it the occurrences of "are", "is", "were", and "was". **Note also that these top 100 lemmas listed below account for 50% of all the words in the Oxford English Corpus.**" [emphasis mine]*

Source: [http://en.wikipedia.org/wiki/Most\\_common\\_words\\_in\\_English](http://en.wikipedia.org/wiki/Most_common_words_in_English), accessed on 04.04.2011

### List of Common Weak Forms in Spoken English

- In spoken English we often use the **weak forms of function words** instead of the strong forms to make the sound spine stand out more clearly. This is true of Standard Pronunciation, dialects, and accents
- The weak form is often made by replacing the vowel sound in the strong form with a **Schwa sound: uh**
- Most function words that have weak forms are **monosyllabic** – they have only one syllable
- If we use strong forms when we should use weak forms, we sound **too formal** and it is more difficult for people to understand us, because the sentence stress is incorrect. Communication is reduced
- If a function word comes **at the end of a sentence** we usually use its strong form, rather than its weak form, e.g. "What are you looking for?" ( for ) or, "Who are you writing to?" ( too )
- If we want to show emphasis or contrast, we can vary the **intonation** by using strong forms where we would normally use weak forms, e.g. "What did *you* think of the book?" ( yoo )

### Spelling and Sounds – Vowel Clusters

A vowel cluster is a group of two or more vowel letters together in a word that represent a single vowel sound. For example, in the word “**road**”, “oa” is a vowel cluster that represents the sound *eu*, whilst in the word “**shoe**”, “oe” is a vowel cluster that represents the sound *oo*. In the same way, “ar” in the word “**car**”, is a vowel cluster that uses a silent “r” to help make the vowel sound *ar*. The reason we have vowel clusters is simple: there are 23 different single vowel sounds (vowel phonemes) in spoken English, but only 5 single vowel letters in written English. We need vowel clusters to represent in spelling all of the different vowel sounds. For example, the letter “a” on its own can make the sound *a* when sandwiched between two consonant sounds, for example in the word “**cat**” – *Kat* – but there is no single letter which can make the very common vowel sound *oo*, as in “**true**” *Troo*. We have to use a vowel cluster – in this case “ue” – to represent this sound on paper.

Vowel clusters can occur anywhere in a word – at the beginning (initial), as in “**out**”; in the middle (medial), as in “**please**”; and at the end (final), as in “**true**”. Focusing on vowel clusters and consonant clusters (see p.217) is useful if you want to look at some of the differences between spelling and sounds in English words. (See also Rhyming Words, from p.30.)

Vowel clusters can be divided into **eight** categories:

1. Vowel Digraphs
2. Vowel Trigraphs and Quadgraphs
3. Vowel Clusters that End with “-r”
4. Other Vowel Clusters with “r”
5. Vowel Clusters with “w”
6. Vowel Clusters with “y”
7. Vowel Clusters with “gh”
8. Vowel Clusters with Other Consonant Letters

What follows is a comprehensive list of vowel clusters, with the sounds that they represent, grouped by letter in alphabetical order. (*Note: you may wish to add your own examples in the space provided.*)

### 1. Vowel Digraphs

Vowel digraphs are two vowel letters together in the spelling of a word that represent a single sound (one vowel phoneme). For example, in the word “**meat**”, “ea” is a vowel digraph that represents the sound *ee*, whilst in the word “**meet**”, “ee” is a vowel digraph that also stands for the same vowel sound: *ee*. This kind of thing can lead to a lot of confusion between spelling and sounds in English!

*digraph:*                      *sounds like:*                      *for example:*                      *my example(s):*

ai	ei	paid, wait, fail, paint, gain	_____
ai	e	said, again	_____
au	or	fraud, pause, autumn, August	_____

### Spelling and Sounds – Vowel Clusters

ou	uh	famous, jealous, onerous	_____
ou	o	cough, trough	_____
ou	u	rough, enough, tough	_____

ue	oo	blue, true, sue	_____
ue	e	guess, guest	_____
ue	uuw	fuel, puerile, duel	_____

ui	ai	guide, guidance	_____
ui	oo	juice, bruise	_____
ui	i	build, building, guilt	_____

Most of the vowel sounds of English (18 out of 23) are represented by these 18 different vowel digraphs. The sounds not represented are: a, i, er, eir, auw. The last three of these sounds are represented by vowel clusters that use “r” (see below).

### 2. Vowel Trigraphs and Quadgraphs

It is possible, though fairly uncommon, to find more than two vowel letters together in an English word. A group of three letters that make a single sound is called a *trigraph*. For example:

*trigraph:*      *sounds like:*      *for example:*      *my example(s):*

eau	eu	beau, eau de toilette <sup>1</sup>	_____
-----	----	------------------------------------	-------

euo	uh	outrageous, contagious	_____
-----	----	------------------------	-------

iou	iy	industrious, harmonious, tedious	_____
-----	----	----------------------------------	-------

A group of four letters that makes a single sound is called a *quadgraph*. For example:

*quadgraph:*      *sounds like:*      *for example:*      *my example(s):*

ueue	oo	queue	_____
------	----	-------	-------

### 3. Vowel Clusters that End with “-r”

The “r” in the spelling helps to make the single vowel sound. Note: the consonant sound r is not pronounced.

## Learn the Clear Alphabet

### Spelling and Sounds – Common Vowel Clusters

A vowel cluster is a group of two or more vowel letters together in a word that represent a single vowel sound. They can be **initial** (at the beginning of a word), **medial** (in the middle of a word), and **final** (at the end of a word). Focusing on vowel clusters and consonant clusters (see p.217) is useful if you want to look at some of the differences between spelling and sounds in English words. Vowel clusters can be divided into eight categories:

#### 1. Vowel Digraphs (two vowel letters together make a single sound)

digraph:	sounds like:	for example:	my example(s):
ai	ei	paid, wait, fail, paint, gain	_____
ea	ee	read, appeal, lead, clean, leaf, steal	_____
ea	e	read, bread, dreamt, dead, dread	_____
ee	ee	wheel, peel, kneel, heel	_____
ei	ee	receive, deceive, receipt	_____
ie	ai	tie, die, lie, pie	_____
oa	eu	oak, foam, loaf, encroach, road	_____
oa	or	broad, abroad	_____
oe	eu	toe, hoe, woe, foe, goes	_____
oe	oo	shoe	_____
oo	oo	school, tool, fool, choose	_____
oo	uu	good, book, took, rook, hood	_____
ou	au	sound, loud, proud, round, house	_____
ui	ai	guide, guidance	_____
ue	oo	blue, true, sue	_____

#### 2. Vowel Trigraphs and Quadgraphs

v/cluster:	sounds like:	for example:	my example(s):
eau	eu	beau, eau de toilette <sup>1</sup>	_____
iou	iy	industrious, harmonious, tedious	_____
ueue	oo	queue	_____

#### 3. Vowel Clusters that End with “-r” (the consonant sound r is not pronounced)

v/cluster:	sounds like:	for example:	my example(s):
air	eir	air, fair, hair, chair, stair, pair	_____
ar	ar	car, guitar, star, bar, shark	_____
ear	iy	ear, beard, dear, appear, fear	_____
ear	er	learn, earn, search, pearl, heard	_____
ear	eir	bear, tear, wear, pear	_____
eer	iy	leer, peer, beer, engineer, steer	_____
er	er	verb, herd, herb, her	_____

<sup>1</sup> in loan words from French

### Spelling and Sounds – Consonant Clusters

A consonant cluster is a group of two or more consonant letters together in a word. For example, in the word “**brilliant**”, “br” is a consonant cluster, as is “ll”, and also “nt”. Consonant clusters are also sometimes known as “consonant blends”. Focusing on consonant clusters and vowel clusters (see p.203) is useful if you want to look at some of the differences between spelling and sounds in English words.

Consonant clusters can occur at the beginning (an **initial** consonant cluster), in the middle (a **medial** consonant cluster) or at the end of a syllable (a **final** consonant cluster). For example, in the word brilliant – Bril ynt – which has two syllables, there is a consonant cluster at the beginning of the first syllable (“br”), at the end of the first syllable (“ll”), and at the end of the second syllable (“nt”). They can also occur in the middle of a syllable, for example the consonant cluster “ch” in the middle of the word “ache”.

We can include consonant *digraphs* within the term “consonant clusters”. A consonant digraph is where two consecutive consonant letters in the spelling of a word are used together to make a single sound. For example, in the word “**know**”, “kn” is a digraph which represents a single sound: n . There are also digraphs which make vowel sounds, for example, in the word “beach”, “ea” is a digraph which represents a single vowel sound: ee .

There are 21 consonant *letters* in the English alphabet, and 25 consonant *sounds* in spoken English. Therefore we need some consonant digraphs to represent consonant sounds because there are more consonant sounds than consonant letters. For example, there is no single letter in English that represents the sound sh . We need to use a digraph – two consonant letters together – and we end up with “sh” to represent sh . Similarly, there is no single letter that represents the sound th . Therefore we need to use a digraph – two consonant letters together – and we end up with “th” to represent th . Confusion can occur because the digraph “th” also represents another, different consonant sound: tt .

Part of the reason for the existence of digraphs – where two letters make one sound – is that English is an old language, and over hundreds of years the pronunciation of different words has changed. Some sounds that used to be pronounced in words are no longer pronounced, although the spelling has remained the same. Some used to be pronounced, but aren’t any more. For example, up until the mid-17<sup>th</sup> century “knife” was pronounced in Old English as a three-syllable word, with the k , the n , and the final vowel sound all heard, like this: k Ni f .

As we have seen in our study of connected speech (see p.11.1 of *Talk a Lot Elementary Handbook*), consonants don’t like to rub up against each other, and elision (where we lose a consonant sound) or assimilation (where a consonant sound changes) often occur when two consonant sounds meet, to make the syllable or word easier to pronounce. So it is no surprise then that the longer the consonant cluster, the more difficult it will be to pronounce, and the more likely it will be that either elision or assimilation take place. For example, try saying: “**twelfths**” out loud. This word crowbars seven different consonant letters into one syllable, which in turn produces six distinct consonant sounds: **T w e l f tt z** ! Another example of a problematic word is “**crisps**”, which is pronounced: **Krispz** . Try to pronounce all of the five distinct consonant sounds (in two consonant clusters) in just one syllable. Tricky!

## Learn the Clear Alphabet

### Spelling and Sounds – Consonant Clusters

Generally speaking most consonant clusters are only two or three letters long. The longest initial consonant cluster can be three letters long, e.g. “spr-” in the word “**sprint**”, whilst the longest final consonant cluster will be generally four letters long, e.g. “-rst” in the word “**firsts**”. Perhaps the prize for the longest consonant cluster would have to go to the word “**rhythm**”, which is solely made up of consonant letters – six to be precise! However, “rhythm” cheats as a consonant cluster, because it actually has two vowel sounds – the “y” acts as the vowel sound *i* in the first syllable, which is stressed, and the second syllable contains an embedded schwa sound: Ri **thm** .

Adverbs are a group of words that can have long consonant clusters at the end, e.g. **exactly**. Elision is likely to occur in such a cluster, for example “exactly” will often be pronounced without the *t* sound, like this: *i Gza klɪ* rather than *i Gza ktɪ* . It would be too much unnecessary effort to try to pronounce the *t* , sandwiched as it is between two other consonant sounds. I say *unnecessary* because the most important sound in this word is the vowel sound on the stressed syllable, the *a* sound. This sound *must* be pronounced clearly, whilst the consonant sounds are less vital to communication.

Consonant clusters can be divided into **five** categories:

1. Consonant Digraphs
2. Consonant Digraphs with Double Letters
3. True Consonant Clusters
4. Consonant Clusters Ending with *z*
5. Consonant Clusters in Compound Words

#### 1. Consonant Digraphs

Some consonant clusters are *digraphs*, which are two letters together in the spelling of a word that combine to make a single sound. Note that most consonant digraphs end with the letter “h”. (When three letters come together to form a single sound, e.g. “-tch” in the word “**fetch**” – which represents the sound *ch* – it is known as a *trigraph*.)

Here are some examples of **initial** consonant digraphs. (*Note: you may wish to add your own examples in the space provided.*)

*digraph:*                      *sounds like:*                      *for example:*                      *my example(s):*

ch	ch	<b>cheer, champion, change</b>	_____
ch	sh	<b>chandelier, champignon<sup>1</sup></b>	_____
ch	k	<b>cholera, chrome, chronic</b>	_____

gn	n	<b>gnat, gnaw, gnome</b>	_____
----	---	--------------------------	-------

kn	n	<b>know, knife, knitting</b>	_____
----	---	------------------------------	-------

wh	w	<b>wh</b> at, <b>wh</b> y, <b>wh</b> ere, <b>wh</b> eel, <b>wh</b> ip	_____
wh	h	<b>wh</b> o, <b>wh</b> ose, <b>wh</b> ole, <b>wh</b> olemeal	_____
wr	r	<b>w</b> riting, <b>w</b> restler, <b>w</b> rong	_____

Here are some examples of **final** consonant cluster digraphs:

*digraph:*            *sounds like:*    *for example:*                    *my example(s):*

ch	ch	beach, coach, roach	_____
ch	k	stomach	_____
ck	k	black, track, pick, flock, luck	_____
gh	f	cough, trough, rough, enough, tough <sup>2</sup>	_____
mb	m	comb, tomb, aplomb, plumb	_____
ng	ng	along, going, eating, meeting	_____
sh	sh	finish, trash, Spanish, fish	_____
th	tt	tooth, youth, bath, path	_____

<sup>1</sup> This is a loan word from Japanese. In the word “**tsar**” (from Russian) the “ts” digraph makes a **tz** sound: Tzar

<sup>2</sup> The digraph “gh” also contributes towards different vowel sounds, e.g. **au** in “**bough**” and “**plough**”, and can be included in various vowel clusters (see p.215).

# Talk a Lot

## Learn the Clear Alphabet

### Spelling and Sounds – Consonant Clusters

Here are some **final** consonant digraphs which occur where the letter “r” is silent because it is helping to make a vowel sound:

*digraph:*            *sounds like:*    *for example:*                    *my example(s):*

rb	b	disturb, suburb, rhubarb	_____
----	---	--------------------------	-------

rn	n	earn, turn, western, learn	_____
----	---	----------------------------	-------

rt	t	hurt, heart, art, start, alert	_____
----	---	--------------------------------	-------

Just to confuse you, here’s a consonant cluster where “r” is pronounced. This is not a digraph, because both of the letters are pronounced, but rather a true consonant cluster:

*c/cluster:*            *sounds like:*    *for example:*                    *my example(s):*

ry	rii	dairy, eery, diary, hairy, bury	_____
----	-----	---------------------------------	-------

### 2. Consonant Digraphs with Double Letters

These consonant clusters are digraphs that comprise a pair of identical letters, which make a single sound when said together. Most consonant letters can be doubled, although doubles with “h”, “j”, “q”, “w”, “x”, and “y” are not natural in English. They usually occur in the middle of a word, although some, like “ff” in “cliff” come at the end. They never occur at the beginning of a word, unless the word has originated from a foreign language, for example “llama” from Spanish or “Lloyd” from Welsh. Here is a full list of consonant digraphs with double letters:

*digraph:*            *sounds like:*    *for example:*                    *my example(s):*

bb	b	robber, sobbing, hobble	_____
cc	k	soccer, occur, stucco	_____
dd	d	pudding, wedding, sadder	_____
ff	f	iffy, cliff, effect, off, effort	_____
gg	g	boggy, flagged, bigger	_____
kk	k	trekking, Trekker	_____
ll	l	alluring, allied, balloon	_____
mm	m	summer, humming, immature	_____
nn	n	runner, annoy, announcement	_____
pp	p	opportunity, shopping, kipper	_____
rr	r	hurry, worried, curry, sorry	_____
ss	s	assess, less, massive	_____
ss	z	possess	_____
tt	t	shutters, cottage, plotted	_____
vv	v	revved	_____

# Talk a Lot

## Learn the Clear Alphabet

### Spelling and Sounds – Consonant Clusters

#### 3. True Consonant Clusters

“True” consonant clusters are phonetic because they are pronounced in the same way as they are spelled. For example, “br” in “**bread**” is pronounced in the same way as the phonemes that it represents: br . In true consonant clusters we pronounce all of the sounds. Note that the consonant clusters below in **bold type** are all good examples of when the consonant sound r is pronounced in an English word. This is helpful to know, because so often in spoken English the letter “r” in a word is not pronounced, since it’s only there to help make a vowel sound, for example in the words: “**car**”, “**more**”, and “**your**”.

Here are some examples of true **initial** consonant clusters:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
bl	bl	<b>blood, blend, black, blown</b>	_____
br	br	<b>bright, bring, brush, brilliant</b>	_____
cl	kl	<b>clear, close, clothes, clever</b>	_____
cr	kr	<b>cry, crime, crow, crop, crumb</b>	_____
dr	dr	<b>drink, drop, drive, drip, dreary</b>	_____
fl	fl	<b>flannel, fly, fleece, flame, flow</b>	_____
fr	fr	<b>frighten, from, frame, France</b>	_____
gr	gr	<b>great, grape, grip, grime, grow</b>	_____
pr	pr	<b>prove, provide, pray, princess</b>	_____
qu	kw	<b>quite, queen, quick, quiet<sup>1</sup></b>	_____
scr	skr	<b>scream, script, scam, screw</b>	_____
sm	sm	<b>small, smart, smelly, smooth</b>	_____
st	st	<b>stay, stop, stink, stolen, sty</b>	_____
str	str	<b>strange, strop, street, strict</b>	_____
tr	tr	<b>tropical, trench, train, triumph</b>	_____

Here are some examples of true **final** consonant clusters:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
ly	lii	<b>only, lonely, truly, rarely</b>	_____
mp	mp	<b>hump, bump, clamp, damp</b>	_____
mpt	mpt	<b>exempt, contempt, dreampt</b>	_____
nch	nch	<b>munch, lunch, bench, stench</b>	_____
nd	nd	<b>end, stand, mend, ground</b>	_____
ndy	n dii	<b>windy, candy, handy, sandy</b>	_____
ny	nii	<b>tiny, meany</b>	_____

...and here are a couple that are neither initial nor final consonant clusters:

<sup>1</sup> Although “qu” is technically a consonant and a vowel together, the sounds that it produces – kw – are both consonant sounds.

# Talk a Lot

## Learn the Clear Alphabet

### Spelling and Sounds – Consonant Clusters

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
lv	lv	salvage, del <b>ve</b> , shel <b>ves</b>	_____
ng	nj	orange, arrange, imp <b>ing</b> e	_____

#### 4. Consonant Clusters Ending with z

These are consonant clusters that end with the letter “s”, which represents the sound **z** at the end of a plural noun, for example:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
nts	nt <b>z</b>	plants, accounts, rents	_____
rds	dz	records, birds, cards, chords	_____
rs	<b>z</b>	colours, rivers, sisters	_____
ts	t <b>z</b>	sweets, oats, boats	_____

#### 5. Consonant Clusters in Compound Words

In compound words, strange consonant clusters can occur, which are not “true” consonant clusters. This is because two separate words have been joined together to make a new word, meaning that the final consonant cluster from the first word has to sit side by side with the initial consonant cluster from the second word. Here are some examples:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>the two words are:</i>
tchb	chb	switchboard	switch + board
ffh	fh	cliffhanger	cliff + hanger
ndf	ndf	grandfather	grand + father
ndbr	ndbr	groundbreaking	ground + breaking

As we have seen, it is common when consonant sounds meet for elision or assimilation to take place (see also Connected Speech, p.11.4 of *Talk a Lot Elementary Handbook*). So, for example, we wouldn’t pronounce the whole mouthful of consonant sounds in the middle of “groundbreaking”: **Graund brei king**, because it would be too difficult in rapid speech to pronounce the final consonant cluster “-nd” next to the initial consonant cluster, “br”. On the contrary, we would automatically employ elision and lose the **d** sound, changing the word into: “groun-breaking” – **Graun brei king** – which is far easier to pronounce.

### Spelling and Sounds – Common Consonant Clusters

A consonant cluster is a group of two or more consonant letters together in a word. They can be **initial** (at the beginning of a word), **medial** (in the middle of a word), and **final** (at the end of a word). Focusing on consonant clusters and vowel clusters (see p.203) is useful if you want to look at some of the differences between spelling and sounds in English words. Consonant clusters can be divided into five categories:

#### 1. Consonant Digraphs (two consonant letters together make a single sound) – INITIAL:

<i>digraph:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
ch	ch	<b>cheer, champion, change</b>	_____
gn	n	<b>gnat, gnaw, gnome</b>	_____
kn	n	<b>know, knife, knitting</b>	_____
ph	f	<b>photo, pharmacy, pharaoh</b>	_____
sc	s	<b>science, scissors, scimitar</b>	_____
sh	sh	<b>sheep, shine, shock, shed</b>	_____
th	tt	<b>thick, Thursday, thanks</b>	_____
th	th	<b>this, that, there, the</b>	_____
wh	w	<b>what, why, where, wheel, whip</b>	_____
wr	r	<b>writing, wrestler, wrong</b>	_____

#### FINAL:

<i>digraph:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
ch	ch	<b>beach, coach, roach</b>	_____
ck	k	<b>black, track, pick, flock, luck</b>	_____
gh	f	<b>cough, trough, rough, enough, tough</b>	_____
mb	m	<b>comb, tomb, aplomb, plumb</b>	_____
ng	ng	<b>along, going, eating, meeting</b>	_____
sh	sh	<b>finish, trash, Spanish, fish</b>	_____
th	tt	<b>tooth, youth, bath, path</b>	_____

#### 2. Consonant Digraphs with Double Letters – MEDIAL:

<i>digraph:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
bb	b	<b>robber, sobbing, hobble</b>	_____
cc	k	<b>soccer, occur, stucco</b>	_____
dd	d	<b>pudding, wedding, sadder</b>	_____
ll	l	<b>alluring, allied, balloon</b>	_____
mm	m	<b>summer, humming, immature</b>	_____
nn	n	<b>runner, annoy, announcement</b>	_____
pp	p	<b>opportunity, shopping, kipper</b>	_____
rr	r	<b>hurry, worried, curry, sorry</b>	_____
ss	s	<b>assess, less, massive</b>	_____
tt	t	<b>shutters, cottage, plotted</b>	_____

# Talk a Lot

## Learn the Clear Alphabet

Spelling and Sounds – Common Consonant Clusters

### 3. True Consonant Clusters (that sound the same as they are spelled) – INITIAL:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
bl	bl	<b>blood, blend, black, blown</b>	_____
br	br	<b>bright, bring, brush, brilliant</b>	_____
cr	kr	<b>cry, crime, crow, crop, crumb</b>	_____
dr	dr	<b>drink, drop, drive, drip, dreary</b>	_____
fr	fr	<b>frighten, from, frame, France</b>	_____
gr	gr	<b>great, grape, grip, grime, grow</b>	_____
pr	pr	<b>prove, provide, pray, princess</b>	_____
qu	kw	<b>quite, queen, quick, quiet</b>	_____
scr	skr	<b>scream, script, scam, screw</b>	_____
sm	sm	<b>small, smart, smelly, smooth</b>	_____
st	st	<b>stay, stop, stink, stolen, sty</b>	_____
tr	tr	<b>tropical, trench, train, triumph</b>	_____

FINAL:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
ly	lii	<b>only, lonely, truly, rarely</b>	_____
mp	mp	<b>hump, bump, clamp, damp</b>	_____
nch	nch	<b>munch, lunch, bench, stench</b>	_____
nd	nd	<b>end, stand, mend, ground</b>	_____
ndy	n dii	<b>windy, candy, handy, sandy</b>	_____
ry	rii	<b>dairy, eery, diary, hairy, bury</b>	_____

### 4. Consonant Clusters Ending with z (at the end of a plural noun) – FINAL:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>my example(s):</i>
nts	ntz	<b>plants, accounts, rents</b>	_____
rds	dz	<b>records, birds, cards, chords</b>	_____
ts	tz	<b>sweets, oats, boats</b>	_____

### 5. Consonant Clusters in Compound Words – (consonant clusters meet) – MEDIAL:

<i>c/cluster:</i>	<i>sounds like:</i>	<i>for example:</i>	<i>the two words are:</i>
tchb	chb	<b>switchboard</b>	switch + board
ffh	fh	<b>cliffhanger</b>	cliff + hanger
ndf	ndf	<b>grandfather</b>	grand + father
ndbr	ndbr	<b>groundbreaking</b>	ground + breaking

## Focus on Connected Speech

### Common Suffixes and What they Indicate

- A suffix comes at the end of a word.
- Suffixes are usually **unstressed**.
- Adding a suffix changes the word type, e.g. a noun changes into a verb.

Below are some examples of how a root word can change type when a suffix is added:

<u>Root Word</u>	<u>Word Type</u>	<u>+ Suffix</u>	<u>Changes to</u>	<u>Word Type</u>
believe	verb	<b>-able</b>	believable	adjective
participate	verb	<b>-ant</b>	participant	noun (person)
walk	verb (infin.)	<b>-ed</b>	walked	verb (past participle)
interfere	verb	<b>-ence</b>	interference	noun
teach	verb	<b>-er</b>	teacher	noun (person)
big	adjective	<b>-er</b>	bigger	adjective (comparative)
China	noun (country)	<b>-ese</b>	Chinese	adjective (nationality)
clever	adjective	<b>-est</b>	cleverest	adjective (superlative)
faith	noun	<b>-ful</b>	faithful	adjective
Russia	noun (country)	<b>-ian</b>	Russian	noun (person)
access	verb	<b>-ible</b>	accessible	adjective
beauty	noun	<b>-ify</b>	beautify	verb
watch	verb (infin.)	<b>-ing</b>	watching	verb (present participle)
memory	noun	<b>-ise</b>	memorise	verb
child	noun	<b>-ish</b>	childish	adjective
science	noun (abstract)	<b>-ist</b>	scientist	noun (common)
attract	verb	<b>-ive</b>	attractive	adjective
name	noun	<b>-less</b>	nameless	adjective
quiet	adjective	<b>-ly</b>	quietly	adverb
arrange	verb	<b>-ment</b>	arrangement	noun
happy	adjective	<b>-ness</b>	happiness	noun

### Discussion Words with Suffixes in Elementary Book 2

Of the 201 individual words with two or more syllables, 156 (78%) have suffixes, which we know are almost always unstressed. This can help us as we try to work out the word stress for each discussion word. On this page you can see all of the words with suffixes, grouped by suffix. The main groups are shown in boxes, with suffixes shown in bold.

(Reference: *Talk a Lot Elementary Book 2*, pp.147-151)

### List of Noun/Verb Homographs

*Homographs are words which are spelled the same, but have different meanings. They often have different sounds too.*

*The following two-syllable words can be used as either **nouns** (with the strong stress on the 1<sup>st</sup> syllable) or as **verbs** (with the strong stress on the 2<sup>nd</sup> syllable).*

*For example, the noun “transport” Tran sport – stressed on the 1<sup>st</sup> syllable – means **a method** of getting somewhere, whilst the verb “transport” tran Sport – stressed on the 2<sup>nd</sup> syllable – means **to take** somebody or something somewhere.*

*Note: the words are grouped by order of prefix. The main groups are shown in boxes, with prefixes shown in bold.*

ally	implant	suspect
accent	import	torment
combine	incense	transfer
commune	incline	transport
compost	increase	update
compound	insert	uplift
compress	insult	upset
concert	intrigue	
conduct	invite	
confine	object	My suggestions
conflict	permit	_____
conscript	pervert	_____
consort	present	_____
construct	process	_____
content	produce	_____
contest	progress	_____
contract	project	_____
contrast	protest	_____
convert	rebel	_____
convict	recall	_____
decrease	recap	_____
default	record	_____
defect	refill	_____
desert	refund	_____
digest	refuse	_____
discharge	reject	_____
discount	relapse	_____
dismount	remake	_____
entrance	reprint	_____
escort	research	_____
exploit	retake	_____
export	segment	_____
extract	subject	_____
impact	survey	_____

Working Out Word Stress – Two-Syllable Words where the First Syllable is a Schwa: uh

*There are many common two-syllable words in English – particularly verbs – where the first syllable is a schwa – uh – as you can see from the table below. **Because the schwa sound is always unstressed, we know for sure that these words all have the strong stress on the second syllable.***

*Note that all of the words begin with the letter “a”, and notice the double consonant letters after many of the verbs, e.g. affect.*

### VERBS

Let's learn the Clear Alphabet so that we can understand the differences between spelling and sounds in English and the wonders of connected speech!

From the Introduction: *"The Clear Alphabet Dictionary is a tool to enable students of English to learn the new phonetic Clear Alphabet, so that they can use it confidently as a means to read, write, and understand the sounds of English – and as a result to pronounce words and sentences better."*

Talk a Lot Clear Alphabet Dictionary will be useful for students at all levels:

<i>Student's Level:</i>	<i>Common European Framework (CEFR):</i>	<i>Cambridge Assessment:</i>	<i>IELTS Score:</i>
Basic User	to A1	KET	2.5 - 3
Elementary	to A2	KET	3.5 - 4
Pre-Intermediate	to B1	PET	4.5 - 5
Intermediate	to B2	FCE	5.5 - 6.5
Upper Intermediate	to C1	CAE	7 - 7.5
Advanced	to C2	CPE	8 - 9

About the Author:

Matt Purland is a lecturer in English Language. He has a BA Honours degree in Drama from the University of Wales and a Postgraduate Certificate in Further Education from the University of Derby. He has written more than 2,000 photocopiable worksheets for learning English. This is his thirteenth book.

*So far, Talk a Lot books have been downloaded more than 900,000 times! Here are some recent comments from teachers about the Clear Alphabet:*

*'I think it can be very useful if we want to sound more "native".'* Marija, Serbia

*'I realised I started to pay attention to the native pronunciation in my speech and in my listening to others since I've started using the Clear Alphabet. I'd like to deal with it further and it would be nice if I could also teach it to others.'* Kata, Hungary
